We (EPA) were involved in the move from the PRP leased storage to a more secure location. Eventually, the call will be made to move them to the US for disposition or recycling. Not sure at this time if this will require overpacks or not, or who will pick up the tab. Stay posted since the original plan included ERRS doing the overpacking/preparation for shipment.

Mark,

We just sampled the upper and lower units. Upper was under the proposed level of 1.3 ppb, the lower was not even close. We are still air sampling (SUMMAs) under the assessment umbrella, and airing out

of the units under same, no ERRS mobilized for Decon at this time. But you never know.

G

Geoff,

Who ended up taking care of the Methyl Bromide?
